How we will calculate your balance: We use the method called the average daily balance (excluding current transactions). To get the “average daily balance” we take the beginning balance of your account each day and subtract any unpaid interest or other finance charges and any payments or credits. We do not add in any new purchases/advances/fees. This gives us the daily balance. Then, we add all the daily balances for the billing cycle together and divide the total by the number of days in the billing cycle. This gives us the “average daily balance.” See your Account Agreement for more details.

Billing Rights: Information on your rights to dispute transactions and how to exercise those rights is provided in your Account Agreement.
